

The School...

The real-world approach to education and market-driven curriculum position MBAs from the McCombs School of Business as some of the most sought-after in the nation. Consistently recognized as a top-20 program, McCombs provides the leaders of tomorrow with the tools they need for success today. To meet and anticipate the changing needs of business, the faculty and staff constantly strive to develop and refine the educational and research experiences. Innovative new programs like Texas Plus will equip our students with comprehensive professional development skills that will benefit them throughout their careers. Our strategic corporate partnerships add value to the overall learning environment and enable us to stay on the forefront of business today.

The Students...

A hands-on curriculum and highly collaborative learning environment at the McCombs School of Business bring to the forefront what we consider our best asset-our students. High achievers in a wide variety of fields, they bring diverse backgrounds, experiences, and perspectives to every class, and add value to the McCombs MBA.

The Community...

McCombs supports a diverse student body, which provides the opportunity for expansion professionally, academically, and personally. McCombs MBA students represent more than 30 different countries, allowing for intense cultural exchange, and with students from every race and religion and a vast range of professional experiences, the community is rich and lively. The school aspires to continue to grow the awareness of diversity issues in both the business school, and ultimately in the workplace. As we expand our community, we would ideally increase the interaction between our current students and prospective students-broadening the scale and scope of our outreach.

The Recognition...

We rank among the top 20 schools according to both U.S. News & World Report and Business Week. In addition, the Wall Street Journal places us among the top 10 programs in the country, based on a survey of corporate recruiters, and Hispanic Business has recognized McCombs as the number one business school for Hispanic students two years in a row.

The Facilities...

The school is a four-building complex of 350,000 square feet that houses classrooms, offices, research centers, and computer laboratories. The University of Texas at Austin has the fifth-largest academic library system in the U.S., which includes 20 libraries, and is listed among the greatest libraries of the world. McCombs is one of the most intensively networked business schools in the country and was one of the first MBA programs to require that every student purchase a standardized laptop.

The business school is home to cutting-edge facilities with nearly 900 workstations in seven different computer labs and an NT lab equipped with 142 state-of-the-art workstations. The school runs a common, wireless operating environment modeled on the highest corporate standards.
